Professional Summary

Informatics graduate from Universitas Nasional with a GPA of 3.73/4.00 and a strong foundation in software development, data analysis, and technology solutions. Gained 5 months of internship experience at the Ministry of Human Rights (KemenHAM), where I contributed to the development of web applications and machine learning systems. Possess strong analytical and problem-solving skills, adaptability, and a passion for continuous learning. Certified in Web Development and Project Management, with proven communication and teamwork abilities to effectively contribute in professional environments.

Education

UNIVERSITAS NASIONAL

2022 - 2026

Bachelor of Computer Science in Informatics | GPA: 3.73/4.0

September 2022 – February 2026

Experience

Kementerian Hak Asasi Manusia

March 2024 – July 2024

- Developed a web-based news classification system using Django and Machine Learning techniques to support information management and digital transformation initiatives.
- Processed and analyzed 1,200+ news articles using Text Mining techniques, including preprocessing, TF-IDF vectorization, and feature extraction.
- Implemented K-Means Clustering to automatically classify news articles into thematic categories and improve content organization efficiency.
- Built interactive dashboards and data visualization features for cluster analysis, monitoring, and manual validation.
- Designed and integrated database structures for managing news datasets, clustering results, and system configurations.
- Evaluated clustering performance using Silhouette Score, Elbow Method, and other clustering quality metrics.

Skills

- **Hard Skills:** Microsoft Excel (Xlookup, IFS, SUMIFS, Count, Average Data Cleaning), SQL (Join, Group By, Aggregate Functions, Filtering Data, CTE), Visualisasi (Pivot Excel, Tableau), Vibe Coding (Python, Web)
- **Soft Skills:** Problem Solving, Critical Thinking, Presentation, Teamwork, Analytical Thinking
